Abracadabra: Magic Johnson and Anti-HIV Treatments Part 1 Questions:
1. The real difference between AIDS and HIV is that HIV is the actual infection, where AIDS is the definition. A person would be said to have AIDS rather than just being HIV positive.
2. -Unprotected Intercourse: It is possible to be easily infected with HIV by having unprotected sex with someone that is infected by the virus.
   -Being exposed to infectious bodily fluids: Blood, Semen, Saliva
3. Being Seropositive means that a person already is producing antibodies for HIV.
4. Some symptoms for acute HIV are as follows fever, tiredness, stomach pains, skin rashes, sore throat, and nausea. Symptoms for AIDS may include but are not limited to diarrhea that lasts for more than a week
   Dry cough
   Memory loss, depression and neurological disorders
   Pneumonia
   Profound, unexplained fatigue
   Rapid weight loss
   Recurring fever or profuse night sweats
   Red, brown, pink or purplish blotches on or under the skin or inside the mouth, nose or eyelids
   Swollen lymph glands in the armpits, groin or neck
   White spots or unusual blemishes on the tongue, in the mouth, or in the throat
5. It allowed people to become more open about STDs, therefore providing more support for individuals with the disease, as well as humanizing them. People found Magic Johnston less relatable do to his diseases.

Typical Course of HIV Infection

2. The most effective place to target and stop HIV would be within enzyme 2 and the least effective target would be enzyme
3. Magic Johnson is not cured of his HIV, It is just that his health choices in life have helped improve his resistance to the virus. The virus would have slowly gone down over the time that he was initially infected.
4. The advantage of using multiple targets during HAART would be prevention of the virus becoming too prevalent inside the body.
5. We disagree, this is due to the price of the medicine over a month’s period: $752.64
The average person may not be able to afford this on a monthly basis.
6. Magic Johnson will impact the view of those with HIV positively. The influence that he will have on GlaxoSmithKline will also reflect them in good light with the public. The ethical aspects would obviously be the thought of using a disease that would be very personal and traumatic for said person for money.
